SLIDE 02 Today's goal

By the end of this lesson, I can:

Compare two options against what the company needs, recommend one with reasons, and respond to a concern about your choice.

- WHO** Your company is running a customer event in two weeks and needs 200 printed T-shirts.
- SITUATION** You have two quotes. Ace Print: RM18 each, delivery in 5 days, you used them last year and the quality was good. Budget Tees: RM12 each, delivery in 12 days, cheaper, but you have not seen their samples yet.
- NEED** Mr. Tan wants your recommendation this afternoon. The budget is about RM3,000, and the shirts must arrive on time.
- GOAL** Recommend one supplier, explain why it fits the needs (time, quality, cost), and respond to Mr. Tan's concern.

Ace Print

- RM18 per shirt · RM3,600 total (over budget)
- Delivery: 5 days
- Used last year — good quality

Budget Tees

- RM12 per shirt · RM2,400 total
- Delivery: 12 days
- New supplier — no samples yet

SLIDE 03 Try it first

Mr. Tan asks: "So, which supplier should we go with? We need those shirts in two weeks." Say something for 30 seconds. Then note what you said.

SLIDE 04 A good message

Kumar's answer. Mark where each part starts.

I'd recommend Ace Print. The main reason is delivery time. They can deliver in five days, but Budget Tees needs twelve, which is very close to the event. Also, we used Ace Print last year and the quality was good. Budget Tees is cheaper – RM12 instead of RM18 – but we haven't seen their samples yet. So overall, Ace Print is the safer choice for this event.

SLIDE 05 Organise it

Ali recommends a laptop for the new staff. Put his sentences in order: Recommendation → Reason → Compare → Recommendation again.

- ☐ That's why the Lenovo is the better choice for us.
- ☐ I think we should go with the Lenovo.
- ☐ The Acer is about RM300 cheaper, but its battery only lasts four hours. Kumar's old Acer died in every long meeting.
- ☐ The main reason is that it has a longer battery life, which matters because the sales team travels a lot.

SLIDE 11 Make a Recommendation

A recommends one of two options to B. B is the manager: listen, then raise one concern. A responds.

1. A reads a decision card and recommends one option (OREO: recommend → reason → compare → recommend again).
2. B (the manager) listens and raises one concern: cost, time or quality.
3. A acknowledges the concern and responds.
4. Swap roles with the next card.
